

ZOMBIE BRAIN SMASH!

Based upon the popular "Frog Launcher" Carnival game, in our version Players reach into a bucket of gooey brains and place them on the launcher. Players then use the mallet to attempt to launch the brain back into the Skull cavity of the articulating Zombie Chained in front of them. In Multi-Player mode, first player to land a brain in the Zombie Skull Wins the Game!

All electric Zombies feature two separate motorized movement systems allowing the entire character's lower torso to sway/ circle as the upper torso undulates in an opposite direction. Creepy and convincing Zombie movements make the characters a spectacle as it also poses a greater challenge to land the brains back into the moving characters open skull cavity.

Priced individually, you can purchase 1,2,3 or more characters and build your own set or you can have us design/build the entire turn key game for you.

You work hard each year to bring patrons out to your attraction, we are working hard to create new and entertaining ways of generating additional revenue from these patrons once on your property. Give your waiting patrons something fun to do with our new collection of showstopping Haunted Carnival Games. Each game is designed to be an immersive experience that is relatively familiar and based on a popular classic carnival game, yet has a fresh horror twist. Each game has a standard name, and has an optional facade to set the scene for a terrifying yet fun experience. The games are designed to have minimal upkeep, and generate even more revenue.

HAUNTED CARNIVAL GAMES ZOMBIE HEAD HI-STRIKER

Players test their strength by getting (3) attempts to ring the bell with the decapitated mumm's severed head. Once the player strikes the target, the zombie's body thrashes and jerks while his severed head races toward the bell. This game provides a quick and simple side attraction with minimal upkeep. Available in Adult and Child sizes to involve every attendee. Give prizes for each height marker reached, or only for ringing the bell.

HAUNTED CARNIVAL GAMES MONSTER OPERATION

Single-Player Mode: A gruesome spectacle based upon the popular kid's game, Players must have a steady hand as they use electronic tongs to extract body parts from a The Monster. If they touch the edges of the exposed cavity a loud buzzer sounds, strobe lights flash, character screams and thrashes back to life and the entire operating table flips up spilling The Monster as their turn is now over having failed the attempt. Players spin a gruesome wheel (3) times to tell them which body part they must extract from The Monster, if they successfully extract three body parts they win a prize. The Monster character has a randomized timer that will unexpectedly cause the character to twitch at different times during the attempts making it more challenging and forcing the players to act decisively. The game is designed to be set in an elaborate, bloody laboratory. Players are positioned behind the table within the set making this an amusing Photo Op and spectacle for the spectators heckling their friends attempting to win the game.

Multi-Player Mode: Allows a group of 2, 3, 4 or more Players to square off in a single elimination challenge, as Players take turns spinning the wheel and extracting the body parts as their competitors cheer them on. Mishandle your assignment and your out...last man to successfully complete the challenge wins the game!

HAUNTED CARNIVAL GAMES
BURIAL CRYPT RING TOSS
 BOTH 5 PLAYER AND 3 PLAYER VERSIONS AVAILABLE

Motized Crypt Sektal Characters	6
Motized Crypt Sektal Characters	2
Static Sektal Hand/Arm	5
Threat Crypt Walk with broken away openings for characters	7
Crypt Coffins with broken away openings for characters	1

Designed as a Multi Player Game- Burial Crypt Ring Toss is a game in which Multiple Players compete against each other as each Player is provided with color coded rings and attempts to land his/her rings on creepily reaching hands of rotting corpses that are climbing out of tombs and burial chambers within the walled-up crypt set. Characters as well as Hands/Arms are motorized, and Game includes sound track, fog machine, candle flickering lanterns and theatrical lighting. Player that lands the most of his/her colored rings wins the game.

HAUNTED CARNIVAL GAMES
PUMPKIN BALL TOSS
 SINGLE OR MULTI PLAYER VERSIONS AVAILABLE

Single Player: Players get (5) chances to land Pumkin Balls into munching mouths of the Pumpkin Gourd Horde. Pumpkin mouths are motorized and Game includes sound track, fog machine and theatrical lighting. Players score small prize for landing (3) Pumpkins and Large Prize for (5) Pumpkins.
Multi Player: (5) Players get (8) chances to land Pumpkin Beanbag Balls into the munching mouths of the Pumpkin Gourd Horde. Pumpkin mouths are motorized and Game includes sound track, fog machine and theatrical lighting. Player who lands the most Pumpkin Balls wins the game.

HAUNTED CARNIVAL GAMES
SKELEBALL

SkeleBall is our Hot New Haunted Carnival Game. Our 13' Tall Animated Skeleton heckles and counts down 30 seconds taunting players to sink skulls in the medieval chained baskets hanging from his undulating hands. Basically its basketball at a moving target with a countdown clock. Its fun, its easy, its gruesome, fast paced and everybody knows exactly what to do the minute they walk-up without any explanation. \$5 for 5-Skulls... you get one in each basket and you win a prize... and its all over in 30 seconds. The Game itself is incredibly economical and most operators will want multiples in a row to maximize revenue. To get here, we modified one of our double actuated 13' tall Super Skeletons, added electrical jaw movements to allow the character to talk, harass and become a built in barker for the game, as well providing head panning left/right and creepy reaching arm movements as well as a whole lower body shift left/right that pivots the entire upper torso to make things look cooler and to make hitting the target a whole lot harder. Movements are programmable and are provided by a two hi-powered electric linear actuator. Character is all electrical and does not require air. Character is sculpted front and back and is a true three dimensional character.

HAUNTED CARNIVAL GAMES
ANGRY CROWS

Based upon the popular "Angry Birds" game, our version features gruesome decaying human Scarecrows that have loud nasty Crows picking at the eyes and flesh of the rotting corpses. Participants use a large slingshot to shoot pumpkin balls at the Crows in an attempt to knock them over. If Players go (5) for (5) they win a Prize. Add a second Scarecrow so that 2 players can square off head to head taking turns.
